Office Action Summary

Part of Paper No. _____

Application/Control Number: 09/868,379
Art Unit: 1617

This is a 371 national stage entry of PCT/EP 99/09683 having a December 9, 1999 International Filing Date, (based on an earlier German priority document filed December 18, 1998).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 8 to 14 are rejected under 35 U.S.C. 102(a) as being anticipated by Rudin et al WO/PCT 99/20237, published 29 April 1999 who clearly describe such ultra finely divided hydroxyapatite particles, within and encompassed by applicants' parameters of length, width, and height (see page 2, bottom ten lines, page 3, top 2 lines) in the form of stable suspensions, with up to 5% surfactants (same as herein) (see pages 4, 6, 7, 8, with several examples with sodium lauryl sulfate surfactant) useful in the form of toothpastes, tooth creams and gels, and mouth rinse (page 9). Rudin et al antedate applicants' December 9, 1999 International Filing Date.

Should applicants desire to obtain the benefit of their German priority date of 18 December 1998, and thereby antedate the 29 April 1999 publication date of Rudin et al, a certified English translation of the untranslated German priority document No. 19858662.0 must be filed.
